

Dear colleague,

please submit your poster before May 18 – regarding requirements, you should stick to portrait format.

Other than that, we have only recommendations:

Keep your title short and interest grabbing, in case add a subtitle (your abstract did not have a title). Include your name, acknowledgements, and institutional affiliation (Logo) as well as the title and date of our conference.

Word count should be relatively low (300-800 words).

Focus on the most important elements of your topic and share that in a visual way.

Keep bibliographical references to a minimum.

Remember to add captions and credits to images and/or graphs.

Use fonts and colours consistently.
